## Stop Knobs

A contemporary and versatile range of door and cabinet knobs suitable for use throughout a project and across a number of applications. The unique sculptured form is available in all finishes.

### Features

- Finger-recess with a soft contour for user comfort
- Internal spring mechanism ensures positive latch and knob return
- Large bearing surface provides support for the solid knob machined from brass or bronze
- Suitable for long back set tubular latches and mortise locks with 38 or 44mm fixing centres
- Knobs are reversible to aid handing and can be turned 90 degrees on the base rose to provide vertical fixing with tubular latches, or horizontal fixing on mortise locks
- Knob fastens to the boss by a socket set-screw on the underside. Removal of the knob allows for tie-screw fixing through the door
- This range of door knobs is complemented by the 'Facet' range of escutcheons 3410 to 3414 in the Accessories Section

## Fixing Centres and Latch/Lock Types

### Stop 741 Door Knob

#### Fixing Centres:

38mm horizontal and vertical and 50.8mm @ 45 degrees

 Projection 25mm  
 Fixing Screw M5

## Specifying

To specify (example)

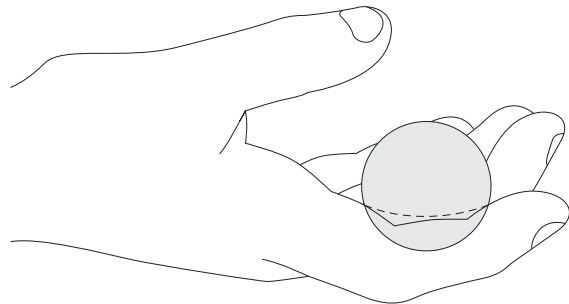

Knob	Finish	Quantity
742	SCPV	2pr

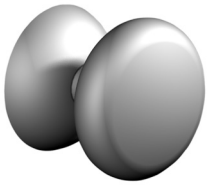

It is recommended that the lock type is stated when ordering knobsets.

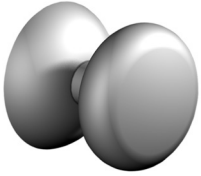

## Cross Section of Stop Knobs Showing Contoured Finger Recess

A unique detail of these knobs is that the finger recess is machined in a curved path. This softens the edge at each end providing a comfortable grip. This detail can be applied to custom made knobs of a cylindrical style with a flat or radius end. Contact chant™ to discuss your requirements.

## Round/Royal Knobs on Rose

Round door knobs and matching escutcheons are designed for front doors and applications where a circular knob is required. This simple, elegant design can be used with a longer backset latch to become a feature of the door. The ability to separate the door knob and latch from the deadbolt and matching escutcheons allows for a variety of combinations to suit individual requirements.

### Features

- Internal spring mechanism ensures positive latch return
- Large bearing surface provides support for the solid knob
- Suitable for long back set tubular latches and mortise locks
- Reversible door knobs aid handing
- Machined from solid brass or bronze

## Fixing Centres and Latch/Lock Types
