

Lift and Slide Assembly 4790
Example Line 5011 Lever Handle Style

Lift and Slide Handle

A lever handle and flush pull designed to be mounted back to back to operate GU Lift and Slide door mechanisms.

The lever handle plate is semi concealed fixed to the outside flush pull through the Lift and Slide mechanism. The plate can be produced in a variety of styles as detailed in the Technical Section.

The plate has detents to hold the handle in the upright and downward positions. Available with fixed or removable lever handle.

Spindle size is 9.7mm (3/8")
